

*“Being developed as one of Europe’s most advanced cheese ingredient centres”*

#### **Custom Built Factory**

Dairy Partners is investing in state of the art plant equipment in what is being developed into one of Europe’s most advanced cheese ingredient centres.

#### **Production Lines**

Our current production line enables us to produce large quantities of identical quality cheese ingredients quickly, efficiently and cost effectively. We also operate a smaller, secondary production line to enable us to be able to cater for smaller business orders of different cheese ingredients.

#### **Supply**

All our products are provided chilled and are in hermetically sealed bags to avoid contamination and to prolong freshness of taste.

#### **Storage Facilities**

All our cheese ingredients are stored in uniquely regulated, refrigerated storage areas. This allows us to keep the cheese at its optimum storage temperature so it reaches you in peak condition.

#### **Transport**

Before your cheese leaves our doors, each batch is rigorously checked to make sure we are supplying you with a top quality dairy ingredient. We have a fleet of specialised refrigerated transport vehicles to deliver our products straight from our factory in Stonehouse, to your door.

For all enquiries please call William Bennett on 01453 828 890.
